Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 22 March 2007.
- 2a) This action is **FINAL**. 2b) This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-6,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arkinstall'852 in view of McCoy'242.

The Arkinstall reference discloses a tracheostomy device (see Figure 1-3) comprising a tubular member 12, an internal retainer 68 and an external retainer 14, but does not disclose a gas seal for substantially sealing the trachea above the opening against the flow of gas, as claimed. The McCoy reference discloses another trachea device that utilizes a seal 21 above the opening into the trachea for the collection secretions that accumulate so that such secretions do not interfere with the tracheostomy device (see col. 3, lines 1-21; and col. 6, line 61 through col. 7, line 5). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Arkinstall device to utilize a gas seal for substantially sealing the trachea above the opening against the flow of gas in view of the teachings of the McCoy'242 reference for the collection secretions that accumulate so that such secretions do not interfere with the tracheostomy device (see col. 3, lines 1-21; and col. 6, line 61 through col. 7, line 5).

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Arkinstall in view of McCoy as applied to claim 5 above, and further in view of Augustine.

The Arkinstall and McCoy teach a trachea device substantially as claimed, but does not disclose the seal as including resilient foam. The Augustine reference discloses another trachea device with sealing parts that are made of resilient foam to facilitate a good low pressure seal. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the seal of the Arkinstall/McCoy device of a resilient foam in view of the teachings of the Augustine reference to facilitate a good low pressure seal.

Allowable Subject Matter

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
